

How to record Observations in Mapeo Mobile

Open your Mapeo App.

If there is a red alert at the top of the screen that says ! **No GPS**, ensure that location services have been enabled.

Mobile
Hotspot

Airplane
mode

Capture+

Location

Click on the large orange button to **start** a new observation

OR click on the camera icon to start an Observation with a **photo**.

The next page that will open shows the possible options for an Observation.

Choose what is happening by clicking on one of the Observation icons.

Click **Add Details** to provide additional information by answering questions.

To add a **photo** of your location to the Observation click the camera.

Click on the checkmark icon to **save** the Observation.

The new Observation should be added to the map as a small circle.

To **view and edit** added Observations click on the cards icon.

There will be icons to **edit**

share

and **delete**

the Observation.
