

Add Configuration of Customized Observations to Mapeo Desktop and Mapeo Mobile

Mobile

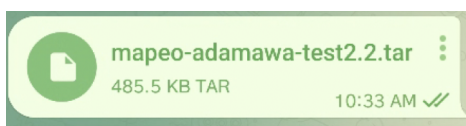

Before and After Loading Adamawa-test:

Go to your email or whatever messaging service you have that allows files to be shared, such as Telegram.

Download the file that ends in `.tar` and check to see that it is in the Downloads folder.

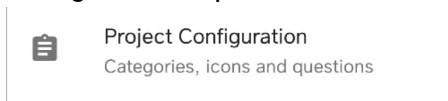

Open Mapeo App and Click on the Observation card icon in the top right:

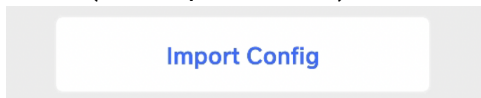

Click on the Settings gear icon in the top right.

This will bring you to the Settings page showing the Current Configuration. Click on the Project Configuration clipboard icon.

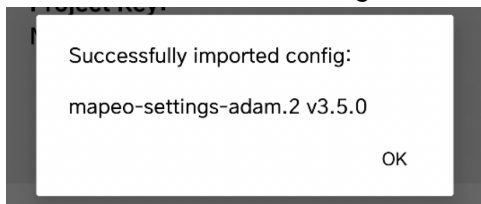

Click on the Import Config button in the center of the page. Note the Current Configuration is v3.5.0 (the Mapeo Default).

Navigate to the Downloads Folder and the Mapeo settings file `.tar` downloaded earlier.

After this, the Current Configuration should change. (Ex: v2.1.0)

Navigate back to the Observations screen with the back arrow.

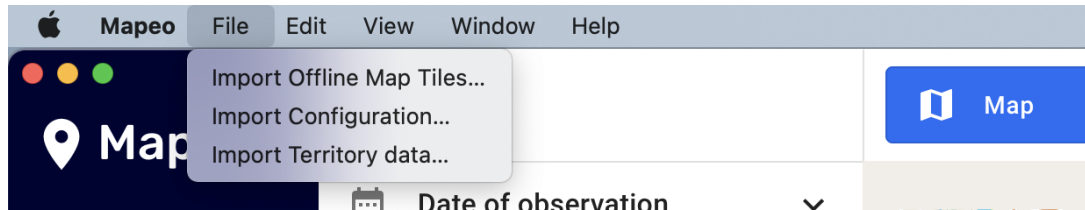

Begin a new Observation. The updated Observation and options within those Observations should be loaded.

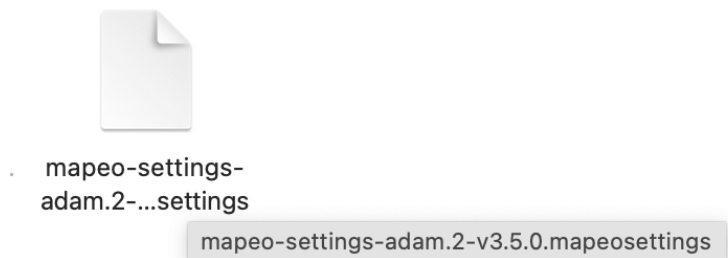

Click through the Observation icons to see what options are available.

Desktop

Click on the File tab, then Import Configuration

Navigate to where the `.mapeosettings` file is within your machine.

After choosing the new file, it should upload and will result in a success alert.
